

Parker - Notice of Discontinuances

R10/R11 General Purpose Regulators

In a continuing effort to simplify Parker product offerings, the R10/R11 General Purpose Regulators, B11/B12 General Purpose Filter Regulators and C10/C11 General Purpose Combos are being obsoleted.

The discontinuance date is **February 28, 2019**.

Orders for these products will be accepted up to and including this date.

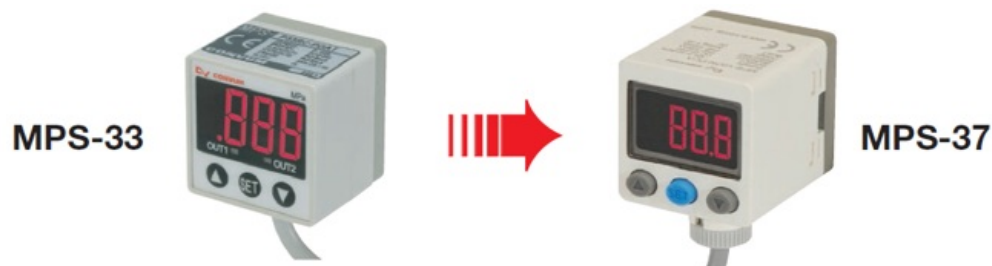

Notice [ND-FRL-60](#) provides for more details, including a list of alternate part numbers.

MPS-33 Pressure Sensors

Due to supplier changes in the internal electrical components, the Pneumatic Division NA is announcing the discontinuance of the MPS-33 Pressure Sensor product line. The division will be launching a new pressure sensor, the MPS-37, in the near future.

The discontinuance date is **December 31, 2018**, however, the MPS-33 product will be available until existing inventory is depleted.

The new MPS-37 has the same panel mounting cut out and surface bracket dimensions. In addition it offers a dual color display and raised push buttons for ease of programming.

Please see bulletin [ND-VAC-29](#) for further detail.
