

ANCHOR FLUID POWER

Now Offering General Purpose & Specialty Solenoid Valves!

Anchor Fluid Power has expanded their inline valve offering to include a [full line of solenoid valves](#). Known for reliability with a wide range of media, solenoid valves are frequently used in process control applications for industries including fluid power, water treatment, food & beverage, medical, rail, automotive and car wash. In addition to their standard line of solenoid valves, they also offer custom solutions specific to your application.

Features include:

- Available in brass, stainless steel or plastic
- Can use in air, water, and steam applications
- 2 or 3-way configuration available
- Normally open or closed configuration
- Direct acting or servo-assisted
- Connection sizes from M5 to 3"
- Working pressures from vacuum to 100 bar
- AC and DC coils

Our goal is to provide our customers with superior products and technical support.

Angle Seat Valves also available!
