

Parker - Notice of Discontinuances

Due to continued focus on product simplification, the Pneumatic Division North America will be obsoleting the products listed below. Please review each product series in detail as each has its own effective date along with specific details.

HBB - HB Base Slide

Effective February 28, 2019, the HBB Series Base (spanned) versions (models 15, 20 and 25) will be discontinued. This obsolescence DOES NOT include the HBC, HBR or HBT Series or HBB service kits. Since there are no direct replacements for the HBB Series, please review [Bulletin ND-CYL-026](#) for viable replacements for this discontinuance.

XL Series Actuators (XLB, XLR, XLT)

Effective February 28, 2019, the XL Series actuators (XLB, XLR, XLT) will be discontinued. Replacement cylinders used on the XL Series will not be affected with this obsolescence. There are no direct replacements for these actuators, please see [Bulletin ND-CYL-027](#) for suggested alternatives for your application.

Legacy Grippers

(GAA, GAW, GPS, GPT, P5G-AA, P5G-AP, P5G-AW)

Effective February 28, 2019, legacy grippers will be discontinued. Series included in this are GAA, GAW, GPS, GPT, P5G-AA, P5G-AP AND P5G-AW. Service kits will be available for one year from the discontinuance date. Since there are no direct replacements, see Section F of the 0900P-6 catalog for a functional replacement. For further details, please see [Bulletin ND-CYL-028](#).

RV01 Relief Valves

Effective May 31, 2019, several options of the RV01 Relief Valves will become obsolete. These options include: 1/8" port size, BSPP port thread and EPDM seal. Pressure settings WILL ONLY be offered in increments of 5 psi. Please see [Bulletin ND-FRL-62](#) for complete details.

H Series ISO Classic Manifolds

After successfully launching the H Series ISO Universal Manifold last fall, the Pneumatic Division has made the decision to obsolete the classic version of the H Series effective July 1, 2019. Included in this obsolescence will be H Series add-a-fold assemblies, manifold sections, end plate, transition, and port block kits for valve sizes HB, HA, H1 and H2.

Individual sub-bases, valves, or accessories of HB, HA, H1, or H2 are NOT included in discontinuance nor are the H3 size manifolds as they are not part of the Universal manifold system. Please see [Bulletin ND-VAL-144](#) for complete details.

Flow Products is your local authorized distributor and application specialist for all your hydraulic and pneumatic product and control system needs. Call us for additional information, technical training requirements and product application reviews.
