

Milwaukee Cylinder Launches New Quick Ship Program

March 18, 2019

Cudahy, Wisconsin – March 18, 2019 – Milwaukee Cylinder, a leader and innovator in the hydraulic and pneumatic actuation field, announces the launch of its new Quick Ship Program for its high-quality NFPA-style tie rod cylinders.

The Quick Ship Program includes a wide range of bore sizes, strokes and mounts in the Milwaukee Cylinder H, LH, and A series product lines, ensuring the vast majority of customer needs can be accommodated by this program. The program is designed to ship up to 6” bore sizes in five or less working days, and up to 8” bore sizes in 10 working days or less. In addition, an Emergency Service Program is available. Under this program, for a small expedite fee, cylinders can be shipped faster, including in some cases, 48-hour delivery or less.

Milwaukee Cylinder is known in the market for their high-quality, high-end cylinders with lasting durability for usage in critical applications. “We have devised a way to make our highly engineered cylinders faster, allowing us to meet or beat lead times of more economy-based cylinders”, said Joe Rogers, Milwaukee Cylinder’s Operations Leader. “This required special thinking, equipment and inventory investments, and enhanced processes, all to benefit our customers”.

Douglas Lacina, the Commercial Director for Milwaukee Cylinder adds, “Quality cylinders are essential in today’s economy, as more and more industrial machines have to work harder and longer to cover labor shortages and increased demand, making our Quick Ship Program a necessity in today’s demanding environment.”

Contact Flow Products at 773-528-2000 for more information on this program and for help in selecting the right product for your application.
