

Flow Products

JANUARY, 2022

EXPERIENCING LONG LEAD TIMES, SHIPMENT DELAYS, FRUSTRATED CUSTOMERS?

As we enter 2022, we are seeing improvements to the supply chain — however, many challenges remain, and projections from industry leaders have the situation lasting well into 2022, and possibly beyond!

One of the major factors contributing to the US supply chain problem has been our reliance on sourcing products from overseas. This has proven to be an Achilles heel to our manufacturing sector.

Want a solution? Call Flow Products — We can help by offering the following:

- We represent some of the top US based manufacturers in the industry! Parker, Eaton/Danfoss, Oilgear, Tolomatic, Milwaukee Cylinder, Baldor and many, many more.
- Our engineering team will perform an evaluation of your application and offer equivalent products from US based sources that comply with Fit, Form and Function of your current products.
- For over 65 years, we have been a leading stocking distributor of hydraulic, pneumatic and electro-mechanical products in the Chicagoland area.

Call us today and speak with one of our Customer Service reps or engineers to begin the application review process — working together, we can improve your lead times!
