## Parker CPS Smart Sensing Continuous Position Sensing

The **C**ontinuous **P**osition **S**ensing series of P8S sensors allows for quick, easy, precise and contactless position sensing via a magnet on the piston. This provides sensing beyond just the end stroke. The system can be installed on standard linear actuators.

Key product features include:

- Continuous position sensing
- No modification to the actuator required
- IO-Link communication with M12 connector
- Analog communication with M8 connector
- IP67 design
- Can be mounted on S-slot, round body or tie rod design with corresponding bracket

## Parker P33 Safety Exhaust Valve Externally Monitored

When applications demand a safe environment, the P33 series of safety exhaust valves are designed to rapidly exhaust compressed air in the event of a fault condition. Monitoring is achieved externally via a two channel system and is done by a PLC or relay.

Key product features include:

- Easy electrical interface with M12 connector
- Solid state pressure sensors
- Quick visual LED indicators on the valve
- Suitable for stand alone use or as part of P33 FRL assembly
- Operating pressure – 150 PSIG
- Ambient temperature – 120F
- IP65 design
